

**Docket Nos. 42310 & 42311**  
**Georgia Power Company's 2019 IRP and 2019 DSM Application**  
**STF-DEA Data Request Set Number 1**

---

**STF-DEA-1-1**

**Question:**

How does the Company's planned renewable energy additions as detailed in the 2019 IRP fit into Southern Company's goals to reduce carbon emissions 50 percent by 2030 and to have low to no emissions by 2050?

**Response:**

The addition of renewable resources as proposed in the 2019 IRP may contribute toward Southern Company's carbon goals; however, these goals do not change Georgia Power's IRP planning process and did not influence the target amount of renewables proposed.
